Information Technology and Communications courses and careers

Technology is all around us. Each time you sms a friend, dance to music on your ipod, ride a tram, have your temperature taken or surf the net, you are using technology. And there's that same variety in technology courses and jobs.

With a flexible course like this behind you, you can work at the cutting edge of loads of industries ranging from fashion to finance, construction to communications. There are plenty of jobs, with plenty of diversity. Design websites, develop games, run projects or run your own business. Immerse yourself in developing the latest gadgets and devices, and make good money doing it.

At this careers event, get the facts on courses and careers from graduates and real technology professionals. Hear about the endless possibilities if you choose to study information technology and communications.
