Vocational Graduate Certificate in ICT Sustainability

“ICT has a very important role in the delivery of successful sustainability outcomes in Australia’s future, from the management of the ICT industry’s emissions, to the development of software that will underpin a national carbon emission trading scheme and the establishment of innovative solutions and best practice across all areas of the economy.

Recognised qualifications in sustainable ICT skills will be a growth market across all industry sectors in the future.” – Bridget Larsen, GM Governemnt Relations, AIIA

The ICT Industry is well placed to be the driving force for change in the new low carbon economy.

As such, Box Hill Institute has developed an ICT sustainability training and education program to meet the industry’s need for skilled people with knowledge and awareness of ICT sustainability issues.

Box Hill Institute has a particular focus on Higher Education and has developed a Vocational Graduate Certificate in ICT Sustainability for 2009. This course is the first of its kind in Australia.

What does the course involve?

This will be a four unit post graduate qualification.

- General sustainability – looking at current issues and solutions
- Green ICT – ICT industry developments to reduce carbon footprint
- ICT as an industry enabler to carbon reduction – focusing on how ICT will help other industries to lower their carbon footprints
- ICT sustainability business case study – skills to develop business proposals to reduce carbon emissions for business

Can I apply?

You should have completed a Bachelor or Diploma in an IT related field. Alternatively, you should have substantial work experience in the IT industry.

How do I apply?

Contact Box Hill Institute direct as we are enrolling now. The course will start on the 25th of August 2009.

Length of course

6 months full time or 1 year part time. Part time will run Tuesday and Thursday evening

Cost:

Full cost \$5400 (\$1350 per subject). FEE-HELP may apply.
