

VICTORIAN INNOVATION & TECHNOLOGY SHOWCASE

There is more to Information and Communication Technology (ICT) than social media, the Internet and gaming. The Victorian Innovation and Technology Showcase is a rare opportunity to see how great ideas and cool technology come together to create exciting innovations which impact businesses and organisations and people's quality of life.

Come and see exhibits and demonstrations from NICTA's Victoria Research Lab and its six Victorian university partners and learn why an ICT career is exciting and where it can take you. Learn how ICT is being applied to industries such as health, transport, farming, advertising, automotive and retail and why it is critical to Victoria's and Australia's future prosperity.

FREE ENTRY

**Tuesday, 29 October 2013
Midday – 5pm**

**Melbourne Town Hall
Corner Swanston and
Collins Street Melbourne**

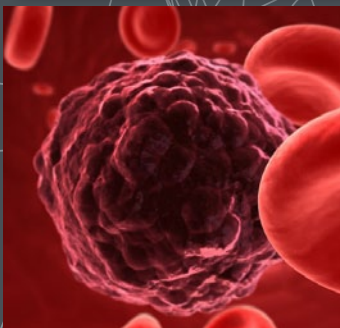

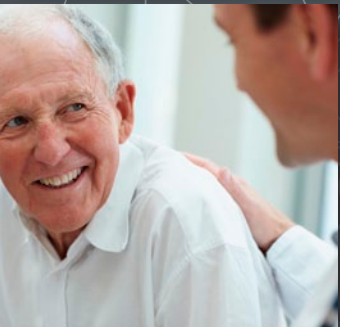

The showcase will include demonstrations on topics such as:

- The development of an Australian bionic eye
- Use of robots in search and rescue situations and inspection of drains
- Energy consumption used by the Internet
- Preparing, responding and recovering from natural disasters
- Telehealth using broadband
- Electronic voting
- Improved decision making on farms
- Managing a power grid
- Managing rehabilitation after a stroke
- Accelerated learning for children with Autism
- Mobile App tools

and much more!

The Showcase will also feature an opportunity to program robots with the Robogals team and meet innovative Victorian companies using ICT in their business.

Please contact Katya Baxter to register your schools interest in attending the Showcase – katya.baxter@nicta.com.au or T: (03) 9035 8080
