Residential Systems

Experience

The company has been operating for over fifteen years. It has a wealth of experience with large commercial to small residential installations.

Staff

IBS staff includes experienced project managers, engineers, programmers, qualified installation staff and full time office support. The company invests in quality staff to provide the best technical service possible to our clients.

Technical Facilities

IBS has a comprehensive technical audio visual workshop for assembling, pre-testing, repair and maintenance of equipment.

Convergence

IBS AV specialises in the application of audio visual control and display with computer information technology.

History

IBS AV commenced as Integrated Broadcast Systems in 1988. The growth in Audio Visual technology and market demands reflected a specialized shift towards the integration of AV products within the commercial, corporate and residential markets. Widespread industry recognition has resulted in IBS AV Pty Ltd becoming one of the leaders in the AV industry.

Solutions

The company is committed to ensuring that it provides the best and most reliable hardware and software solutions for its clients and is continuously undertaking research and development to evaluate "worlds best" products and services.

Support

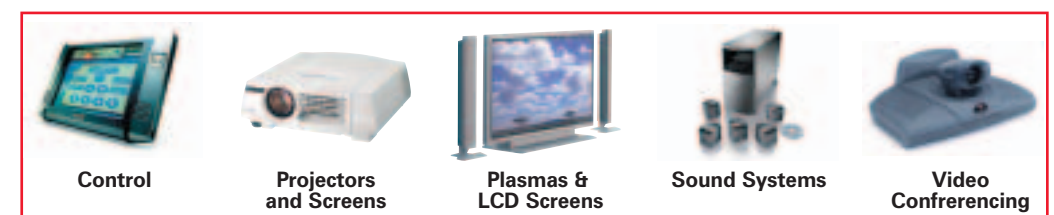

IBS AV provides a comprehensive ongoing customer support staffed by our experienced service technicians. We can offer various service packages including Australia wide 24/7 support.

Industry Certification

IBS is a registered member of these organisations.

IBS is certified to the ISO9001:2000 standard.
