

# Skill Building

Remember to write it in pseudocode first!

## Skill 2: Airport.py

A plane with 300 passengers has landed. Write a program that sorts the passengers out. How many passengers have Australian passports and how many have International passports. You should be able to tell how many passengers have filled in a Customs Declaration Form and declared something to go through customs, and how many illegal items were seized and what these illegal items were, e.g. a crate of chickens, dried figs, wooden items with spiders, box of snakes, Asian fruits with bugs, beef jerky, drugs, fur coat with teeth and a moose head.
