# Microchip Projects for Dummies

All **SYSTEMS** Teachers
This is a must.

- Experience the engaging projects using micro controller technology.
- Year 10 students design, build, program and document Alarm controllers in one day!
- This simple to use program allows teachers and students to create **a brain** that can make decisions for projects to meet all VCE Outcomes..
- Forget the endless typing and syntax errors and quickly create programs that use the drag and drop.
