The iTrolley

Computer Trolleys by Process Systems Services

The Process Systems Services Pty Ltd Laptop trolley has been designed especially for schools, colleges or universities and is 100% manufactured in Australia.

Made of steel, it is strong, sturdy and holds upto 10 laptops with a covered tray on top which stores the computer chargers (power supply units).

Simply plug the trolley into any convenient power point and all 10 computers can be charging overnight whilst safely and securely stored away.

Price \$1,465.00

(Price Includes GST - Shipping Costs Extra)

The iTrolley

Look at these features...!

- * Powder coated finish
- * Sturdy and rigid construction
- * Fabric lined shelves are non scratching
- * Fabric lined tray for chargers and power leads
- * 10 Point Charger with plug connection to mains supply
- * Lockable metal bar for security and for safety during transit
- * Large rear wheels for rough terrain or moving up and down stairs
- * Smooth running front castors with foot operated brake for sloping areas
- * Tip onto back wheels or move smoothly across level surfaces on four wheels
- * Compact storage - the base is only 57 cm x 57 cm with an overall height of 130 cm
- * The high level security features include wheel locking bolt and combination padlock

Computer Trolleys

The well proven iTrolley manufactured in Australia by Process Systems Services has a long way in quality and features for many years. Our top-selling basic 10-shelf Laptop trolley

now offered with various options aimed at improving the overall functions of the trolley making it more than just a cart.....

* iTrolley - P This iTrolley has eight storage compartments for Laptops and an extra shelf for secure storage of a computer projector. The top storage compartment for the projector is fitted with a horizontal lid which can be used as an elevated stand for the projector when it is being used in the classroom or lecture theatre.

* iTrolley - R This iTrolley is similar in design to the 'iTrolley P' except the extra deep storage shelf can be used for an RF Transmitter such as the Apple Airport unit.

* iTrolley - S This model is fitted with an additional shelf located behind the handle which can be hinged up and locked in place when in use. It is used as a stand for a laptop computer in conjunction with a projector when a teacher or tutor is doing a classroom presentation.

* Any of these variations can be ordered in isolation or all together. For example - if 'iTrolley - PRS' is ordered it will have 6 storage shelves for the Laptop Computers, a seventh shelf for storage of the RF device, a deeper eighth shelf for storage of the projector and a rear shelf for use as a Laptop stand.

More than just a cart - now a functional work station. Suitable for all Laptops, Notebooks, iBooks, PowerBooks and PC Laptops.

All models still come with the earlier security features of shelf locking bar and locking wheels.
