

Goulburn Ovens  
Institute of TAFE

# Safe Use of Machinery in Technology

The course is comprised of 3 units:

- VBQU618 - Applying OHS Principles to Technology Teaching – 8 hrs (Prerequisite – nil)
- VBQU619 - Safely Operate and Maintain Wood Working Machines – 16 hrs (Prerequisite VBQU618)
- VBQU620 – Safely Operate and Maintain Metal Working Machines – 8 hrs (Prerequisite VBQU618)

## Course Outcomes:

The proposed outcome of this course is to provide technology teachers working with wood and metals working machinery with the skills in:

- Applying principles of OH&S legislation and requirements relevant to machines commonly used by students and teachers in technology
- Safely operating items of machinery commonly used by students and teachers
- Identifying, assessing and controlling hazards when working with machines commonly used by students and teachers
- Safely managing machines in a school setting
- Providing first level maintenance for machines commonly used by teachers and students
- Transferring safe operating principles to a range of machines
- Ensuring that protective items, such as guards, clothing etc are used in accordance with requirements.

**Duration:** 4 days (32 hours)

## Entry Requirements:

Potential participants in this course should be teachers who are registered with or have permission to teach from the Victorian Institute of Teaching, or students who are enrolled in an approved course in education and who can demonstrate the ability to operate wood and metal working machinery used in technology teaching.
