# Build Skateboard Decks in Class!

Skateboard Deck building can be used as a focus to include a wide range of subjects into your curriculum.

Help your students earn their mandatory and elective credits while building skateboard decks in class. Easy to teach, easy to learn, a win-win for students and teachers.

Teachers now building skateboard decks in class report that:

- *Attendance levels are up*
- *Students are focused, attentive and apply themselves to complete their decks*
- *At-Risk, Over/Under achievers easily grasp the learning concepts and excel*
- *Teamwork and mentorship occur naturally during the build process*
- *Students discover hand skills they didn't know they had*
- *The program provides great flexibility to include required learning*
- *Students relate well to skateboards and its counter-culture aspects*
- *It is a great opportunity to involve their immediate and outside community*
- *It can be a self-supporting program for materials*
- *Is a great fund-raising program*

Students build a laminated maple veneer deck that they can be proud to display as an art project, or eventually use as transportation or exercise. Hardware does not need to be a part of this project, keeping costs and liability issues to a minimum.

**Australian Skateboard Kit deck builds do not require the use of power tools and can be done in any classroom or even outdoors. No harmful glues, paints or coatings need to be used. We will also support teachers with a curriculum to get the program started. You do not have to be a woodwork teacher! The Maple Veneer is 100% Canadian. The best veneer for building skateboards**

**Skateboard Deck Building works for:** VCE Design - VCAL - Woodwork - Arts - Incentive / Rewards - Environmental Projects - Technical Construction - Math, Science and Physics - Youth Outreach - Mentorship - School Holiday Programs - Skate Park and Store related events - School and Community Fundraisers & Much More
