Session 1

3D Effects in Flash

Are you ready to push your Flash skills to the next level? Impress your students by showing them how to create stunning 3D Effects in Flash!

Visual Design - Elements and Principles Made Elementary!

Many teachers struggle with teaching the concepts of design. Marian show you how to make elements elementary!

Session 2

CSS - A User's Guide

A good grasp of CSS is now a requirement for working in the Web Design Industry. Make sure that you have a grasp of the basics with this practical guide to CSS.

Love your Content! Love your Copy!

VET teachers almost universally struggle with the unit of Content and Copy. As it becomes more and more important in the examination, Sue shows us how to make it interesting!

Session 3

Create Characters!

Stuart walks you through the character creation process, from concept to storyboard. Create characters with personality, presence and punch!

Build a Poker Machine in ActionScript.

This practical session will introduce you to the concepts of functions, parameters and randomisation - vital concepts for game making in Flash!

Concludes: 4pm
