NOT JUST A GIRL

Hi - My name is Ashleigh and I'm a **Freelance Online Architect** (or **Freelance Web Designer** to most) living in Telford, England. I have **more than 5 years industry experience**, designing websites in Photoshop and building them in Dreamweaver. **Web Design** is my passion; it is what I love to do - and I have won a number of awards for it. On this website you will find [my CV](#), examples of [my work](#) and a list of [services](#) I publicly provide. *Welcome to my digital playground!*

The bright composition of her own site follows through in James's commissions

Ashleigh James » www.ashleighjames.com

Skills: XHTML, CSS, PHP, Photoshop, Dreamweaver, Web 2.0

Employment status: Freelance web designer (currently available for hire)

For Australian designer Ashleigh James, web design has been a passion for most of her life. Now living in the UK, James designed her first website when she was eleven-years old. Even though a page full of animated gifts doesn't necessarily constitute as web design, she soon aspired to create bigger and better things, moving on to develop her XHTML, PHP and Photoshop skills. She studied VET Multimedia at Bayside Secondary College in Melbourne, and was awarded a vocational student prize from the Australian Government for her design talent. James then went on to complete a diploma in Information Technology at Victoria University, specialising in website development. Her first job was as a junior web developer at an internet marketing company, which she started two days after the completion of her diploma. Three months later, she decided to move to England and began working as a freelance web designer upon her arrival. When asked what she loves most about web design, James told us that, "Web design enables me to transform a completely blank document into anything I can visualise. You're essentially creating something from nothing. What's not to love about that?"

James's work strikes a great balance between informal and professional
